

Road Allowances

Farmers are reminded that cultivating and spraying road allowances destroys grass which is necessary to preserve the road. The municipality will have to re-plant grass in areas where it has been destroyed, and the cost of doing so will be charged to the abutting landowners.

Road allowances are a minimum of 66 feet in width, and many are 100 feet or more. Farmers who spray and cultivate the road allowances are trespassing.

Complaints about weeds growing on road allowances, as justification for ploughing, spraying and seeding to crop, are to be addressed as follows:

1. Grass takes a year to become established; so there will be weeds during the establishment period.
2. Once grass is growing, the road shoulder will be preserved, and the life of the road will be lengthened.
3. Building roads only to have them destroyed is a waste of all taxpayers' money.
4. Farmers who encroach upon the road allowances and destroy grass or tear up road shoulders should pay individually for reseeding.
5. The RM asserts its right to grass its road allowances.

Pests

Lockable bait stations, \$15 each are available at the RM office. Bait can be enclosed, making it inaccessible to children & pets.

Rebates of 50% of poison expenses for gopher control are available:
